

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country excursion in their RV. Freshly retired, after spending numerous years working with his brother to manufacture their crane business into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

All through their journey, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable market for a product that could promptly and safely lift people in the air to accomplish upkeep and other construction services.

After returning from their holiday, John set up a partnership with two of his friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into quite a few international markets and continues to cultivate contemporary equipment to ensure that consumers are able to become safer and more well-organized within their workplace.
